

SENIS - Customer Reference:

Quadrant Silicon Valley Research Center – USA, California

QUADRANT

Big thanks to Quadrant for their warm hospitality during our visit. We are grateful for the chance to directly see the impact of our SENIS 3D Hall Technology and measurement instruments.

Quadrant Silicon Valley Research Center – USA, California

www.quadrant.us

Quadrant is the worldwide leader in the magnetic industry. Their portfolio of products, services and technologies solve customer challenges in magnetic applications. From design, R&D, prototype validation to mass production, Quadrant provides a one-stop solution for magnetic applications.

“Customers like our product for two reasons; the first one is that SENIS Hall probes can measure all three components of magnetic field with unprecedented accuracy and repeatability very close to the magnet surface and in small gaps. The second reason is that SENIS software is very user-friendly and offers different types of analysis, with different types of data visualisation.”

About SENIS AG

SENIS AG, Switzerland develops, manufactures and supplies advanced sensors and instruments for magnetic field and electric current measurement as well as the corresponding development and engineering services. Our solutions and services help our clients in the automotive, consumer electronics, test and measurement industries, as well as to research institutes to create powerful, robust and effective products.

SENIS® Magnetic Field Mapper MMS-1X-RS installed at ABB Switzerland is a high-end magnetic field scanner that can be applied for mapping of all three components of DC or AC magnetic field. It can be used at customers in the R&D and as a quality assessment tool in production lines for accurate 3D mapping of permanent magnets.
